

A CSE Crosscom Company

# Florida's Largest and Most Experienced Motorola Solutions Channel Partner

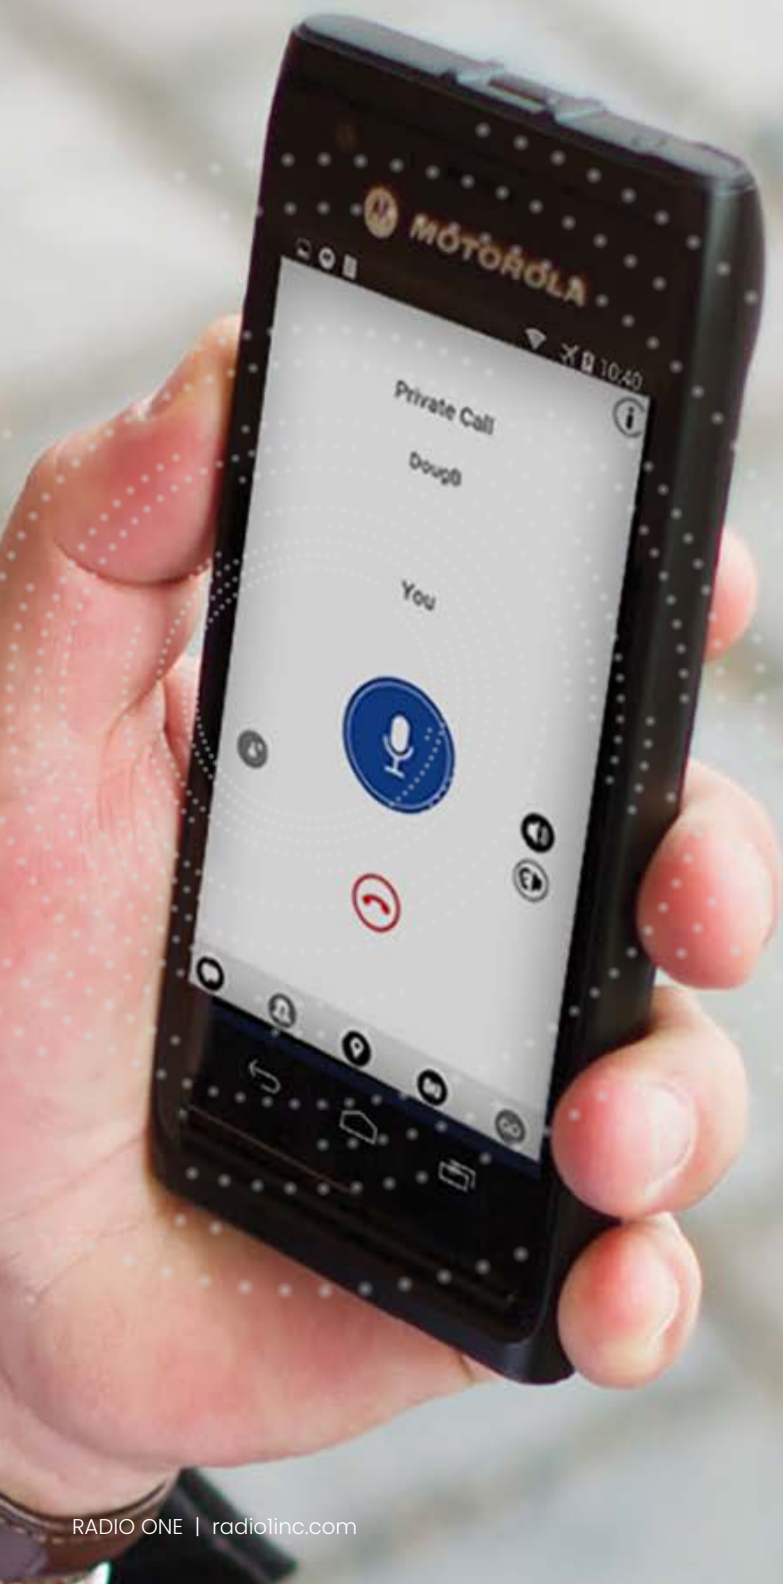

MOTOTRBO RADIOS & SYSTEMS | DISPATCH CONSOLES | WAVE PTX | BDA-DAS SYSTEMS  
VIDEO SURVEILLANCE | BODY-WORN CAMERAS | LICENSE PLATE RECOGNITION  
VIDEO ANALYTICS | ACCESS CONTROL | INCIDENT MANAGEMENT  
MASS NOTIFICATIONS | SMART SENSORS | WORKFLOW AUTOMATION

**Radio One a CSE Crosscom Company is a Platinum Motorola Solutions partner, providing end-to-end wireless communications and security solutions to customers across Florida and beyond for over 30 years.**

### **Motorola Critical Communications & Avtec Dispatch Consoles**

Whether it's a single-site application or across a wide-area network, we have the expertise and end-to-end solutions to keep you connected when it matters most. MOTOTRBO transforms your school, facility, or business with remastered digital technology. Whether you need a lightweight radio or a robust solution with multiple talk groups, we have the right fit for you. Avtec dispatch consoles enhance our system, providing operators with intuitive interfaces and advanced communication tools for efficient coordination.

### **Public Safety BDA & DAS (ERCES)**

Local mandates established by the FCC with oversight by the National Fire Protection Agency (NFPA) and International Fire Code (IFC) require facilities to be complaint in providing first responders with reliable two-way radio coverage for emergencies. Working with the Authorities Having Jurisdiction (AHJ), Radio One's Public Safety - Distributed Antenna Solutions (PS-DAS) meet or exceed local mandates, keeping buildings compliant and ensuring reliable radio coverage for all first responders.

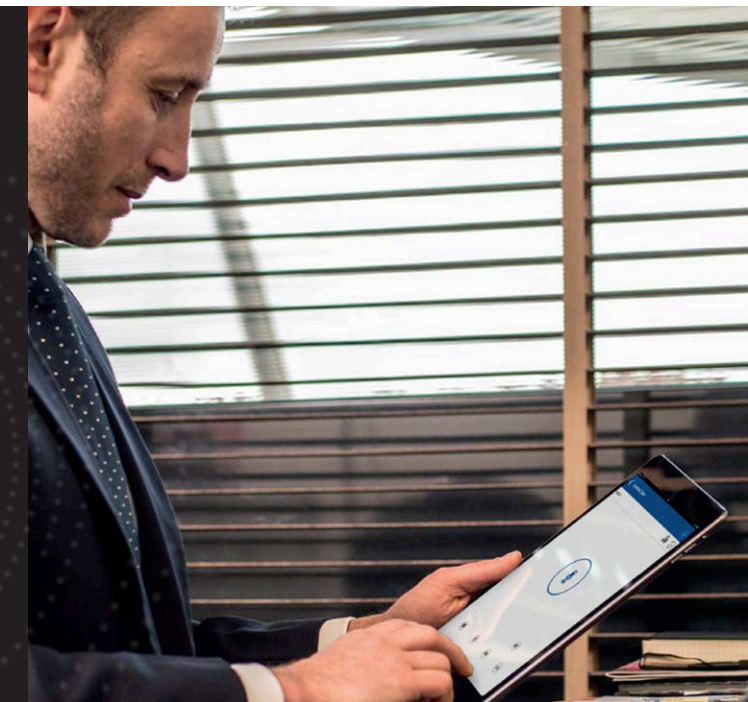

### **Motorola Solutions Service Specialist**

Radio One is an authorized Motorola Solutions Service Specialist. Our experienced, Certified Electronic Technicians (CETs) are Motorola-trained, service professionals committed to keeping your system and devices performing at peak efficiency.

### **Motorola WAVE PTX**

WAVE is a network-independent broadband, nationwide, Push-To-Talk (PTT) subscription service that instantly connects your team across any device, from any location at the push of a button. With the WAVE PTX mobile app, your smartphone, tablet, or computer can act like a two-way radio for instant PTT communication.

## **Avigilon Video Surveillance: End-To-End Security Solutions**

Avigilon's next-generation security suite provides a comprehensive portfolio of end-to-end video cameras and intuitive advanced analytics and services. Avigilon offers both On-Prem and Cloud based VMS solutions including artificial intelligence and video analytics to help you detect, verify, and act on critical events.

## **Avigilon AI Video Analytics**

Avigilon's AI-powered video analytics transforms security by filtering out irrelevant motion and alerting operators to critical incidents in real time. It detects movement of people and vehicles, uses Facial Recognition to identify persons of interest, and ensures proactive responses. With Focus of Attention, teams can view all cameras on a single screen. Features like firearm detection, crowd size monitoring, and audio analytics enhance decision-making, helping your team respond faster and more effectively.

## **Body Worn Camera Integrations**

Extend your fixed video footprint to include a first-person perspective with body-worn cameras, now integrated with Avigilon Video. Designed to support workers during aggressive or confrontational situations, our body-worn cameras help foster trust between your team and the public by providing an unbiased, independent witness. This integration enhances situational awareness and strengthens your overall security strategy.

## **License Plate Recognition Software**

Motorola's License Plate Recognition (LPR) software boosts security and streamlines investigations. Quickly search for vehicles by type, color, and event details, and monitor real-time activity to detect potential threats. Set rules-based alerts for unauthorized vehicles to take swift action, enhancing perimeter security, parking management, and providing actionable intelligence.

## **Avigilon Access Control**

Help keep your people, facilities and assets safe with Avigilon Access control. Designed to meet your organization's unique needs while ensuring the highest level of security, our access control solutions comes with an intuitive interface, streamlined operations and future-proof integration possibilities. Avigilon offers on-prem and cloud-based solutions.

## HALO Smart Sensors

Motorola's HALO Smart Sensor provides unparalleled protection for your facility with advanced health and safety detection. It tracks air quality, including CO2, particulates, and VOCs, while also detecting vaping and THC use to maintain a compliant environment. With privacy-first security, HALO ensures sensitive areas are protected without cameras. Seamlessly integrate HALO into your existing systems for real-time, actionable insights and enhanced security.

## Ally Incident Management

Motorola Ally simplifies security operations with a cloud-based platform for real-time incident management. Access data anytime on smartphones, tablets, or the MOTOTRBO Ion Portable Smart Radio. Embedded analytics and reporting enhance decision-making, while instant alerts improve response. Fast to deploy, easy to use, and scalable for any industry.

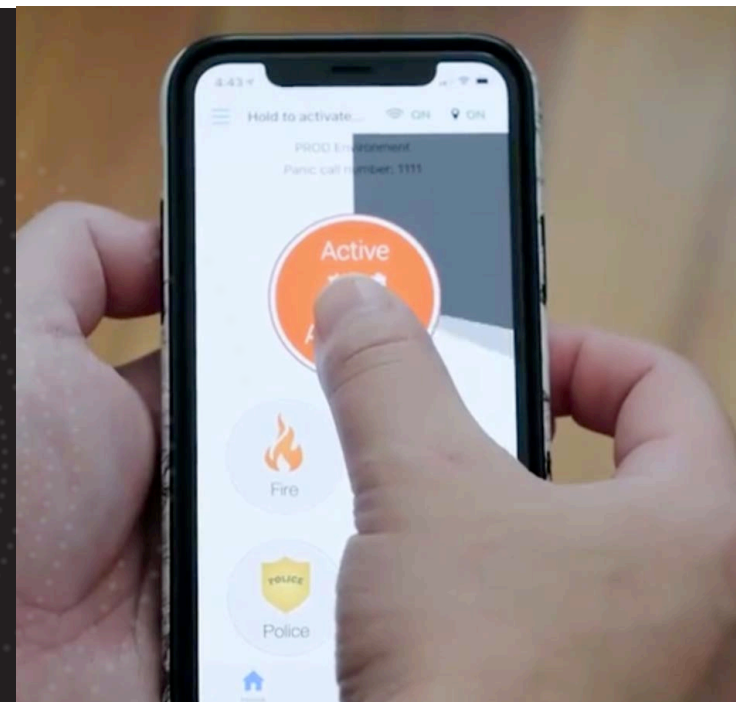

## Orchestrate Workflow Automation

Motorola's Orchestrate is a revolutionary, game-changing cloud-based workflow automation platform that transforms operations. With its intuitive drag-and-drop interface, users can automate complex processes across voice, data, video, and analytics. By harnessing analytics-driven logic, it boosts efficiency, accelerates decision-making, and empowers teams to achieve unprecedented productivity at scale.

## Rave Alert Mass Notification System

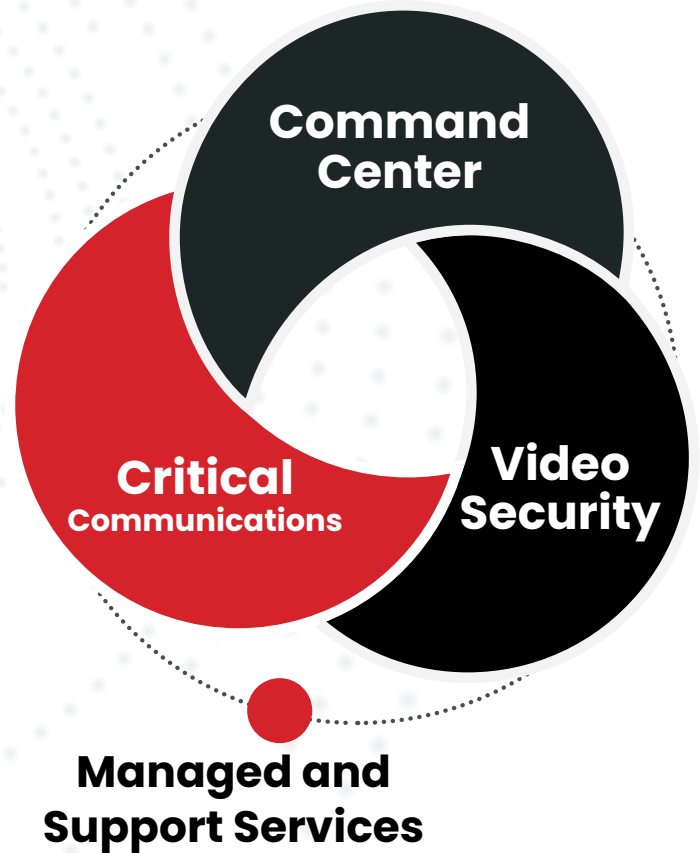

Motorola's Rave Alert is the most widely used mass notification system, trusted by schools, businesses, and public safety organizations nationwide. It delivers reliable messages in seconds, ensuring critical alerts reach the right people. Easy to deploy and use, it keeps teams connected and informed during any event.

# Powering **Safety** with **Intelligent Solutions**

A safety and security ecosystem, because people and technology are stronger united.

Motorola Solutions' ecosystem suite of solutions is transforming the safety and security sector by integrating advanced technologies that enhance communication, situational awareness, and data-driven decision-making. With a comprehensive range of tools—including innovative software, hardware, and analytics—Motorola Solutions empowers organizations to respond more effectively to emergencies and streamline operations. Radio One stands out as the premier partner for organizations looking to elevate their safety and security systems. With expertise in deploying and managing these cutting-edge solutions, Radio One ensures seamless integration and optimal performance, enabling clients to better protect their communities and assets in an increasingly complex environment.
